 This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 					
2. This REPORT consists of a total of 5 sheets, including this cover sheet.					
3. This report is also accompanied by A					
a. (sent to the applicant and	to the International Bu	reau) a total of	sheets, as follows:		
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).					
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.					
b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) 1, containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).

DOX 140. 111	Non-establishment of opinion with regard to noverty, inventive step and industrial applicability			
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:				
t	he entire international application.			
⊠ cl	laims Nos58-63, 67-72, 83-84, 91			
because:				
	the said international application, or the said claims Nos. 58-63, 67-72, 83-84 relate to the following subject matter which does not require an international preliminary examination (specify):			
The	inventions of claims 58-63, 67-72, and 83-84 concern a method for treating the human body			
by therapy, which does not require an international preliminary examination by the International Preliminary Examining Authority in accordance with PCT Article 34(4)(a)(i) and Rule 67.1(iv).				
	he description, claims or drawings (indicate particular elements below) or said claim No91s so unclear that no meaningful opinion could be formed (specify):			
	· · · · · · · · · · · · · · · · · · ·			
	escribed in any of claims 86 to 90." This description encompasses all compounds and			
	compositions obtained by that identification method. However, no specific compounds			
	by this identification method are described in the Specification. Therefore, claim 91 lacks full			
	e in the sense of PCT Article 5 and lacks support by the specification in the sense of PCT			
	In addition, when the level of technology at the time of filing is considered, it is entirely			
unclear what kinds of compounds are specifically included and what kinds of compounds are not				
	and therefore the above claim is unreasonably vague and does not satisfy the requirement for			
clarity stipulated in Article PCT 6. As a result, no judgment can be rendered concerning the invention described in the above claim.				
☐ ti	the claims, or said claims Nos are so inadequately supported by the description that no meaningful opinion could be formed.			
П	no international search report has been established for said claims Nos. 58-63, 67-72, 83-84, 91			
	the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:			
ti	the written form has not been furnished			
	does not comply with the standard			
ti	he computer readable form has not been furnished			
	does not comply with the standard			
	he tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with he technical requirements provided for in Annex C-bis of the Administrative Instructions.

The inventions described in claims 1-57, 64-66, 73-82, 85-90, and 92-94 involve an inventive step with respect to documents 1-4 cited in the international search report. Documents 1-4 do not describe either carbohydrate metabolism-associated gene transcription factors or their relationship to calpain. Moreover, persons skilled in the art cannot easily conceive of such matters.

Supplemental Box Relating to Sequence Listing				
Continuation of Box No. 1, item 2:				
 With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this report was established on the basis that of: 				
a. type of material				
a sequence listing				
table(s) related to the sequence listing				
b. format of material				
in written format				
in computer readable form				
c. time of filing/furnishing				
contained in the international application as filed				
filed together with the international application in computer readable form				
furnished subsequently to this Authority for the purpose of search and/or examination				
received by this Authority as an amendment* on				
2. In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
